

This Is a Paid Advertisement

BUT so were the advertisements calling men to the Army, Navy and Marine Corps not so long ago. The people of Tulsa paid for those advertisements because they felt that in doing so they were helping to protect their country.

NOW the war is over. The country is safe. But the same Tulsa people who bought space in these columns to urge the manhood of this city on to battle for the sake of their country and of humanity, have again bought space in this paper, *this space*. But this time it is to urge the voters on to battle for the sake of this city and the human lives which cling about it.

OPEN YOUR EYES—you who vote and you who do not vote—for these words are written in sincerity by those who have the welfare of this community at heart. Tulsa subscribed \$45,000,000 to help save the world and Tulsa will subscribe \$5,000,000 to save itself.

BECAUSE—there is an undercurrent of misrepresentation in this community, calculated to frighten the honest tax payers into believing that a vote for the water bonds will ruin them, **BUT**---

THE FACT IS—that a city which gave \$45,000,000 in one year to carrying on the war for the benefit of humanity, can certainly afford to spend \$5,000,000 in twenty-five years to benefit itself and its people, for

THE BONDS MEAN—a greater and more prosperous Tulsa, a lower disease and death rate, a savings of millions in bottled water, and pure water a-plenty for those who cannot afford to buy bottled waters.

WE BELIEVE IN TULSA—the bonds will not materially increase our taxes.
We are **FOR SPAVINAW AND THE WATER BONDS**.
